Fone: +55 (35) 98897-1102

Summary:

Experience in developing responsive and functional web applications with dynamic pages using HTML, CSS, JavaScript and frameworks such as React. Skilled in implementing responsive design principles and utilizing CSS library like styled-components for flexible and reusable styling. Proactively stay updated with the latest web development trends and technologies to ensure the delivery of cutting-edge solutions that meet the evolving needs of users and businesses.

Education:

Bachelor of Information Systems (in progress)

Impacta Tecnologia University – February 2022

Languages:

English – advanced

Portuguese – fluent

Skills:

- HTML
- CSS
- JavaScript
- React JS
- SQL
- Python
- Knowledge of Git and version control

Projects:

Vitalize Platform - https://vitalize.vercel.app/

- Vitalize is a health and fitness web application using React JS along with Vite to enhance the development process. Designed a dynamic and responsive design utilizing styled-components.
- The application integrates with two APIs to provide its core functionality. The APIs are used to fetch exercise data, allowing users to explore a wide range of exercises categorized by body part, target area, or equipment. They also enable users to access recommendations and explore healthy recipes by name or calories.
